'The Lost Tomb of Amenhotep I: Understanding Papyrus Abbott'

David Rohl

The Tomb of Amenhotep - possibly the first to be made in the Valley of the Kings, has, to date, never been found or identified.

Well-known author and broadcaster David Rohl turns detective and reveals that valuable information about the existence and whereabouts of this elusive and important tomb might be found in contemporary and later texts.

David is never afraid to be controversial, always entertaining and informative. He is one of our most popular speakers, having visited MAES several times.
